Life Plan for Your Business is a process that works with business owners and decision makers to address the unique challenges of the business including both the daily issues and in planning for the long term. The focus is to help business
owners be prepared when life does the unexpected – whether that be something positive (unanticipated growth, for example) or something negative (a health issue forcing a business leader to fast forward their exit strategy.)

This workshop will look at the top five concerns for business owners -- 1) business growth, 2) recruiting top talent, 3) sale or transfer of business, 4) cash flow management, and 5) retention of key employees – and align these concerns with tools and resources that can help you make decisions, improve your business and ensure your exit plan matches up.
