

**BELLIN
FOR
WOMEN**

CANCER, GENETICS, AND YOU 2.0

Did you know there are more than 20,000 human genes?

In recent years, we've learned so much about how genes work and why some diseases run in families. While we can't change our genes, knowing we have a higher-than-average chance of developing certain diseases can help us take steps to lower our risks for cancer.

In our second segment of Cancer, Genetics, and You, you'll hear a powerful personal story from Karla, a woman facing a strong family history of breast cancer and how she managed it. Presenting with her are two incredible medical experts explaining every step of Karla's journey.

All attendees will be entered to win a \$50 prize!

**Tuesday, October 13
5:30-6 p.m.**

VIRTUAL via WebEx

This event is free, but registration is required. To register, go to bellin.org/calendar or call 920.445.7373 or 888.758.7373.

Have questions you'd like answered at the event? Submit them to BellinForWomen@bellin.org
